

The TLM eclipse for small production runs

This new laminating machine finishes print jobs in small runs: **quickly, flexible and with first class results.**

Ideal for copy shops, digital printing works or as backup machine for contract laminators and offset printers

The decisive advantages

- simple to operate and compact design
- easily wheeled to new location
- quickly convertible to another format
- same laminating quality as large machines
- compact: only requires 2.2 m² base
- rollers extremely easy to access

 Machine construction with passion.

Technical specifications	TLM eclipse
Laminating throughput	up to 12 m/min
Formats	from 20 x 29 cm to 52 x 72 cm banners, max. width 52 cm
Paper thicknesses	from 120 g/m ² to 0.6 mm
Films	OPP gloss, matt or canvas textured from 15 to 40 µm
Flatness, sheet feeder	infinitely adjustable sheet smoothing (decurling) unit
Stack height	single sheet with infeed conveyor
Connection values	4.5 kW
Control unit	intuitive with color touchscreen
Controller	modern with Ethernet and USB connection supporting remote maintenance option
Space requirement	210 x 105 x 126 cm (L x W x H)
Place change, dead weight	simply transportable thanks to integrated castors, 300 kg dead weight
Design	sheet feeder with infeed conveyor

Standard equipment

- manual sheet feed via infeed conveyor
- automatic shingling: 2 to 25 mm overlapping selectable
- laminating roller with wear-resistant oxide-ceramic coating
- electrical roller heating to up to 130°C
- automatic separation and tearing off of sheets
- control via color touchscreen
- machine mounted on castors
- pivoting expansion shaft

Adaption features

- if required: conversion to automatic sheet feeder
